FLPod LED LUX SERIES

FLPod LED Lux Strip is a modular strip light system. It has proven to be exceptionally reliable and stable in countless diverse applications - from external signage/cove lighting to recessed strips in extreme areas such as pools, saunas and water features. Its used internally and externally as a decorative light source and low consumption alternative to traditional strip lighting. It is 12V and comes pre-sealed and pre-wired with maximum moisture protection.

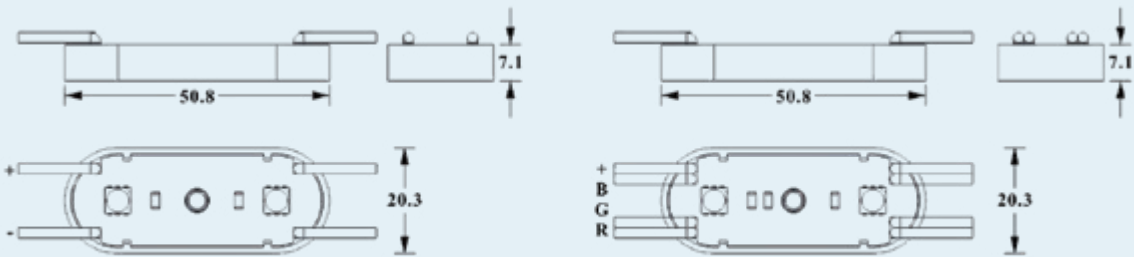

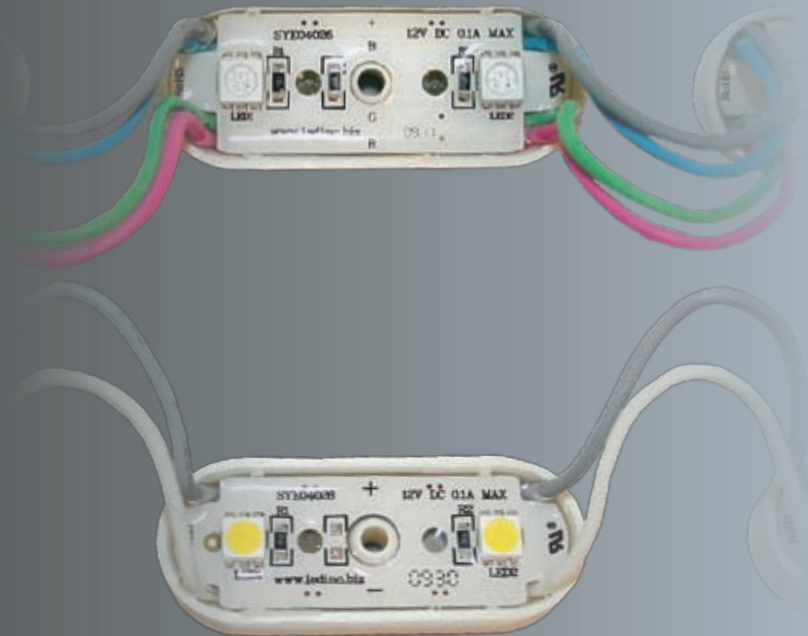

- Replacement for neon, fluorescent and signage lighting
- Exterior/Wet Location strip lighting applications
- Proven durability in countless strip-lighting applications countrywide
