

LED TUBELIGHTS

FibreLED 5ft LED Tube installed into vapour-proof fittings
Reduction from 130Watts per fitting to 40Watts - Carlow Shopping Centre

TUBELIGHT SERIES

FibreLED LED Tubes offer a durable and extremely efficient alternative to traditional fluorescent lighting with countless environmental advantages and substantial consumption savings.

FibreLED Tubes are available with clear cover for maximum light output or frosted cover for a visually seamless replacement. Our tubes have been rigorously tested and built to the highest standard for long life maintenance free applications.

FibreLED Tubes installed within an industrial production facility, running 20hrs/day at a ceiling height of 4metres

LED TUBELIGHT SERIES

FibreLED Tubes have been installed in a number of high profile locations throughout the country and have recently been approved by the HSE as part of their energy drive. FibreLED tubes have also been retrofitted into vapour-proof fittings in car parks

	Dimensions	LED	Voltage	Lumen	LED Quantity	Expected Life @ 100%	Wattage	Colour Temperature
Clear								
FLTUBE600-C	600mm	3528SMD	230V	> 850lms	174	> 50,000hrs	9W	4,000 -5,000K
FLTUBE120-C	1200mm	3528SMD	230V	> 1700lms	360	> 50,000hrs	18W	4,000 -5,000K
FLTUBE150-C	1500mm	3528SMD	230V	> 2200lms	450	> 50,000hrs	22W	4,000 -5,000K
Frosted								
FLTUBE600-F	600mm	3528SMD	230V	> 800lms	162	> 50,000hrs	8W	4,000 -5,000K
FLTUBE120-F	1200mm	3528SMD	230V	> 1600lms	243	> 50,000hrs	16W	4,000 -5,000K
FLTUBE150-F	1500mm	3528SMD	230V	> 2000lms	408	> 50,000hrs	22W	4,000 -5,000K

- High Lumen SMD LED Chip c/w resin seal base
- PVC Pin ends ensures voltage protection and heat dissipation
- Aluminium alloy heat sink along length of the lamps ensures maximum thermal management
- No Mercury, toxins or glass in the manufacture or disposal
- Immediate start from switching
- No need for starter or ballast resulting in lower consumption / operating level
- 80% Consumption against traditional fluorescent savings in some cases
- Available in Natural, Daylight and warm white colours
- Available with emergency conversion packs
- Suitable for any application whereby a fluorescent is the norm
- Suitable for commercial office installation within ceiling grid fittings
- Suitable for carpark lights vapour proof fittings etc.
- Certificates - RoHS CE

(exact specification may change due to constantly evolving product quality)

FibreLED tubes installed into ceiling grid light within an office environment
Academy Building, Dublin

FibreLED tubes installed into Ceiling Grid lights in an office environment
HSE HQ Swords, Dublin
